Software Engineer

Aspiring Software Engineer with Strong Foundation in Web Development, from UI design to full-stack solutions.

I am a dedicated and detail-oriented web developer with hands-on experience in full-stack applications, specializing in React. My internship experiences have allowed me to develop a solid foundation in programming and design, while my passion for creating intuitive user experiences and robust applications drives my work. I excel in collaborative environments and am committed to continuous learning and excellence.

Technical Proficiencies

Coding	JavaScript (ES6) MERN Nodejs
Technology	HTML5 CSS3 Responsive Design Express.js
Front-end	React Redux Bootstrap
Back-end and Databases	RESTful APIs MongoDB
Tools	Git GitHub VSCode Postman ViteJs ChatGPT

Experience

Web Developer Intern | Emumba Pvt Ltd – Islamabad July 2024 – August 2024

- Developed full-stack applications, including a Budget Tracker App and an eCommerce app leveraging React and Express.js.
- Created RESTful APIs and tested them using Postman, adhering to best coding practices.
- Built frontend projects like an NPM Package Comparator, Portfolio App, and Restaurant App.
- Enhanced professional communication through daily stand-ups and mentorship collaboration.
- Organized company events, contributed to workplace culture.

Game Developer Intern | Pixel Square Pvt Ltd _ Rawalpindi June 2023 – September 2023

Designed and developed a hide-and-seek game and a sniper shooting game with 100 levels using Unity 3D including mechanics, level design, animations, and sound effects.

Projects

SmartPrep AI (MERN Stack, OpenAI API)

- Developed a full-stack web app to simulate realistic AI-powered interviews (Text & Video).
- Built real-time feedback engine analyzing response content, tone, confidence, and body language.
- Designed personalized dashboards with progress tracking and performance analytics.
- Added LinkedIn integration to fetch live job listings based on user preferences.
- Implemented a Career Navigator for personalized career paths with skill roadmaps and course links.

BeautyStore Website (React, Nodejs, Expressjs, Mongodb, Python)

- Developed a website for makeup shopping with a recommendation system.
- Implemented AI-based product suggestions chatbot.
- Enhanced the user experience with a visually appealing and responsive design.

Budget Tracker App (React, Nodejs, Expressjs, Mongodb)

- Built a personal finance management app for tracking income and expenses.
- Designed an interactive UI for budget visualization and categorized expense tracking.

Portfolio Website (React)

Developed a responsive portfolio website to showcase personal projects and skills, highlighting UI/UX expertise.

Education

Bachelor of Science, Software Engineering | Bahria University – Islamabad, PAK (July 2025)

Majors: Software Design & Architecture, Software Project Management, Software Quality Engineering, Web Engineering
Others: Object-Oriented Programming, Data Structures & Algorithms, Database Management Systems, Operating Systems

Awards & Accolades

1st Position, Final Year Project (Bahria University Open House 2025) | 4.0 GPA , 8th Semester (2025) | Merit Scholarships, BS-SE Semester 3 to 8 at Bahria University (2018)
